Adults and adolescents 15 years and above living with HIV

1. Follow National Tuberculosis Control Programme Manual 2018 for investigation of TB disease
2. Use symptom screen to rule out active TB
   - Cough, fever, weight loss, night sweats
   - Suspected or confirmed active TB
   - Prior adverse events or hypersensitivity to INH
   - Prior adverse events or hypersensitivity to rifapentine or rifampicin (3HP only)
3. Patients on TPT should additionally receive vitamin B6/Pyridoxine to prevent neuropathy

Screen for Active TB disease

No symptom
Assess for contra-indications to 3HP

No contraindications
Initiate 3HP

Contraindications to 3HP
Eligible for 6H

Yes
Initiate 6H

No
Defer preventive treatment

Any one symptom
Investigate for TB and other diseases

Other diagnosis
Treat as appropriate

TB
TB Treatment

Follow up and consider TPT once illness resolved

KEY:
3HP = 3 months isoniazid/rifapentine
6H = 6 months isoniazid
