Children <15 yrs living with HIV with and without household Tuberculosis exposure

**HIV positive children <15yrs**

- **Sign or symptom** suggestive of TB present or a known household TB exposure
- **No sign or symptom** suggestive of TB and no household TB exposure

**0-12 months**

- Close contact of a pulmonary TB index case?
  - Yes
    - Refer for hospitalization
  - No
    - **TB diagnosis excluded**

**> 12 months**

- **START TPT**
  - Yes
    - Physical signs/symptoms or CXR suggestive of TB
    - Xpert MTB/RIF detected
    - Start TB treatment
  - No
    - **NO Preventive Therapy**

**Children on DTG, LPV/r or NVP**

- 3HP/B6
- 6H/B6

**Children on EFV**

- 3HP/B6
- 6H/B6

---

**Note:**

- Any cough, any fever, any weight loss or profuse night sweats. Children < 5 years, consider as presumptive TB and refer for TB diagnosis.
- Other co-morbidities e.g. severe anaemia
- Strict symptom criteria:
  - Persistent, non-remitting cough or wheeze for more than 2 weeks not responding to standard therapy
  - Documented loss of weight or failure to thrive during the past 3 months especially if not responding to food and/or micronutrient supplementation, OR severe malnutrition
  - Fatigue/reduced playfulness
  - Persistent fever > 10 days
  - Two or more of these symptoms are highly suggestive of TB disease

---

**KEY:**

- B6 = vitamin B6 / pyridoxine
- CXR = chest X-ray
- 3HP = 3 months isoniazid/rifapentine
- 6H = 6 months isoniazid

---

**Follow National TB Control Programme Manual 2018 on diagnosis of pediatric TB and check for any signs and symptoms such as cough, unexplained weight loss, decreases appetite, failure to thrive and/or malnutrition, fever, night sweats, diarrhea, lethargy, irritability, abnormal chest examination.**

**Indications requiring hospitalization/referral:**

- Severe forms of PTB and EPTB for further investigation and initial management
- Severe malnutrition for nutritional rehabilitation
- Signs of severe pneumonia (i.e. chest in-drawing) or respiratory distress

---

**Before starting a child on preventive therapy, exclude risks for hepatotoxicity and peripheral neuropathy.**

**Plan for monthly follow-up visit to monitor adherence, side-effects and tolerability of preventive therapy, development of TB symptoms.**

**Follow National TB Control Programme Manual 2018 for pediatric TB diagnostic work-up.**

**All HIV positive children should receive vitamin B6.**

**Definition close contact:** a person living in the same household as or in frequent contact with (e.g. creche care provider, school staff, etc) the index person.
